TENNESSEE DEPARTMENT OF HEALTH AND ENVIRONMENT FIRST TENNESSEE REGIONAL HEALTH OFFICE 1233 SOUTHWEST AVE. EXT. JOHNSON CITY, TENNESSEE 37601

February 25, 1985

Judge Lon V. Boyd Sullivan County Jail & County Offices Sullivan County Courthouse Blountville, Tennessee 37617

Re: Notice of Violation Sullivan County Courthouse & Jail NPDES No. TN0056782 Sullivan County

Dear Judge Boyd:

In accordance with the rules and regulations of the Tennessee Department of Health and Environment, on January 11, 1985, David Saulsbury and Jeff Horton of this office, accompanied by Toby Cressell of Sullivan County Courthouse, conducted an inspection of the watewater plant referenced above. The following comments concern deficiencies and problems noted at the facility:

- 1. At the present time, this facility is not being operated by a certified operator. Part III of your discharge permit (NPDES No. TN0056782) states, "The waste treatment facilities shall be operated under the supervision of a Class I, package plant certified operator in accordance with the Public Water and Wastewater Environmental Health Act of 1971." Procedures should be initiated to acquire the services of a properly certified operator, or attempt to have the present operator certified.
- 2. A potential problem was noted concerning the storage of chlorine used for disinfection of the effluent. At the time of inspection, a 55-gallon drum containing industrial strength bleach (12.5% socium Hypochlorite) rests on its side in a holder, with the valve directly over a floor drain in the building. In the event of a leak, or problems with the valve, a spill could result which could kill the microbial growth in the treatment plant, and cause high chlorine concentrations to reach the creek. I suggest that the chlorine storage barrel be placed in an upright position, and some type of hand pump or other device be used to remove the contents of the barrel.
- 3. The clarifier and the holding tank before the tower needs to be checked regarding solids content. If the solids level appears high, then steps need to be taken to have some of the solids wasted from the system.
